Dear Bob,

I'm very pleased to hear that someone is interested in funding your research on HFGW; I've always thought this was worth pursuing. As you probably well know both DARPA and NSF are part of "old boys" networks. Unless you personally are a close friend with someone there - forget it. Just be thankful that the Chinese are not as close minded on the subject of HFGW as the U S funding establishment.

george chapline

HFGW = High-Frequency Gravitational Waves

DARPA = Defense Advanced Research Projects Agency (the research and development agency for the US Department of Defense)

NSF = National Science Foundation

Dr. Chapline is the senior physicist at the Lawrence Livermore National Laboratory, USA. He was Edward Teller's Principal Assistant. Teller developed the Hydrogen Bomb.
